Celebrity Watch Music

This project identifies public figures that support Planned Parenthood's agenda in whole or in part. Categories include acting, **music**, and writing.

Many celebrities have expressed support for legal abortion and/or Planned Parenthood. Some have merely lent their names to the pro-legal abortion effort. Others are actively involved, donating money as well as time. This information is presented to underscore Planned Parenthood's influence in the entertainment industry and with other well-known individuals.

These people do not need our condemnation, for we, too, could have been listed herein were circumstances different. What they need is prayer.

This is by no means a complete list and additions are made as *verifiable* information becomes available. Consequently, please be sure to check back frequently.

The **singers/bands/musicians** have expressed support for legal abortion and/or Planned Parenthood's agenda (in whole or in part). Individual artists are listed in alphabetical order by last name. "The" is omitted from the beginning of band names (example: "The Toadies" is listed under "Toadies"). Please note that the names of some bands are offensive in that they include sexual innuendo or words and/or blasphemy. While we strive to provide error-free information, there is always a possibility of human error or mechanical breakdown. Please let us know if you believe an error has been made.

This list was updated in **August 2014**.

- 10 Foot Pole
- 10,000 Maniacs
- 16 Horsepower
- 3
- 30.06
- 4 Non Blondes
