## Celebrity Watch Others

This project identifies public figures that support Planned Parenthood's agenda in whole or in part. Categories include acting, music, and writing.

Many celebrities have expressed support for legal abortion and/or Planned Parenthood. Some have merely lent their names to the pro-legal abortion effort. Others are actively involved, donating money as well as time. This information is presented to underscore Planned Parenthood's influence in the entertainment industry and with other well-known individuals.

These people do not need our condemnation, for we, too, could have been listed herein were circumstances different. What they need is prayer.

This is by no means a complete list and additions are made as *verifiable* information becomes available. Consequently, please be sure to check back frequently.

The following is a list of **others** who have expressed support for legal abortion and/or Planned Parenthood's agenda (in whole or in part). Individuals are listed alphabetical order by last name. While we strive to provide 100 percent accurate information, there is always a possibility of human error or mechanical error. Please let us know if you believe an error has been made.

This list was updated in **August 2014**.
